**Camera Lucida**-Roland Barthes 1981 "Examining the themes of presence and absence, the relationship between photography and theatre, history and death, these 'reflections on photography' begin as an investigation into the nature of photographs. Then, as Barthes contemplates a photograph of his mother as a child, the book becomes an exposition of his own mind."-- Alibris.

**Philosophical Experiments and Observations**-Robert Hooke 2014-09-11 Shortly after Hooke died in 1703, his miscellaneous papers and unpublished manuscripts were entrusted to Richard Waller, who edited and published some of them in a volume titled *The Posthumous Works of Robert Hooke* (1705; reprinted, Frank Cass, 1968). Waller himself died, however, before he was able to complete the task of republishing Hooke's papers and they were eventually handed on to William Derham. After delaying for what some of Hooke's followers thought to be a scandalously long time, Derham finally published this volume in 1726. It contains numerous papers and notes by Hooke as well as a number of important papers and letters written by Hooke's contemporaries and found, evidently, among Hooke's literary remains. This is an exact facsimile reproduction of Derham's edition of the *Philosophical experiments and Observations of the late Eminent Dr. Robert Hooke* (1726) except that an analytical table of contents, prepared by the General Editor, has been added. First Published in 1967. Routledge is an imprint of Taylor & Francis, an informa company.

**Misery Obscura: The Photography of Eerie Von (1981-2009)**-Eerie Von 2015-05-27 From the deepest depths of punk rock's 1970s primordial wastelands, through the stygian goth swamps of the 1980s, and on into the bloodstained arenas of 1990s heavy metal, Eerie Von witnessed it all. Beginning as the unofficial photographer for punk legends The Misfits and later taking charge of the bass guitar as a founding member of underground pioneers Samhain and metal gods Danzig, the evil eye of Eerie Von's camera captured the dark heart of rock's most vital and bleeding-edge period, a time when rock and roll was not only dangerous, but downright menacing. Eerie Von's lens has documented everything from The Misfits' humble beginnings in Lodi, New Jersey, to the heights of Danzig's stadium-rock glory alongside metal superstars Metallica. As well as an essential visual

document of music history, Eerie's road stories of triumph and damnation bring to life an era the likes of which will never again be seen.

**The Optics of Giambattista Della Porta (ca. 1535-1615): A Reassessment**-Arianna Borrelli 2017-03-22 This volume contains essays that examine the optical works of Giambattista Della Porta, an Italian natural philosopher during the Scientific Revolution. Coverage also explores the science and technology of early modern optics. Della Porta's groundbreaking book, *Magia Naturalis* (Natural Magic), includes a prototype of the camera. Yet, because of his obsession with magic, Della Porta's scientific achievements are often forgotten. As the contributors argue, his work inspired such great minds as Johannes Kepler and Francis Bacon. After reading this book, researchers, historians, and students will have a better appreciation of this influential scientist. They will also gain a greater understanding of an important period in the history of optics. Readers will learn about Della Porta's experimental method, a process governed by the protocols, aims, and theoretical assumptions of natural magic. Coverage also discusses the material properties and limitations of optical technology in the early 17th century, based on a recently discovered Dutch spyglass. It also demonstrates how diagrams were instrumental in the discovery of the sine law of refraction. In addition, the book includes an in-depth analysis of previously untranslated Latin sources. This makes the material useful to historians of optics unfamiliar with the language. More than 70 illustrations complement the text.

**The Mind of a Mnemonist**-A. R. Luria 1987 *The Mind of a Mnemonist* is a rare phenomenon--a scientific study that transcends its data and, in the manner of the best fictional literature, fashions a portrait of an unforgettable human being.

**Secret Knowledge**-David Hockney 2009-05

**Abelardo Morell**-Elizabeth Siegel 2013 This title offers a look at the work of photographer Abelardo Morell.

**Camera Obscura**-Sarah Kofman 1999 In her opening chapter on Marx, Kofman provides a reading of inversion as necessary to the ideological process. She then explores the metaphor of the camera obscura in Freud's description of the unconscious. For Nietzsche the camera obscura is a "metaphor for forgetting," and it is neither the photographic nor the eye but the mind that constructs a preeminence of the perspectival. Kofman asks here whether the "magical apparatus" of the camera obscura, rather than bringing about clarity, serves some thinkers as fetish. She turns to Descartes for a final counter-example, that of the Cartesian camera obscura as a model of vision which neither disqualifies the eye as a model of knowledge nor sets up a perspectivist notion of perception.

**Narrow But Endlessly Deep**-Peter Read 2016-06-15 On 11 September 1973, the Chilean Chief of the Armed Forces Augusto Pinochet overthrew the Popular Unity government of Salvador Allende and installed a military dictatorship. Yet this is a book not of parties or ideologies but public history. It focuses on the memorials and memorialisers at seven sites of torture, extermination, and disappearance in Santiago, engaging with worldwide debates about why and how deeds of violence inflicted by the state on its own citizens should be remembered, and by whom. The sites investigated — including the infamous National Stadium — are among the most iconic of more than 1,000 such sites throughout the country. The study grants a glimpse of the depth of feeling that survivors and the families of the detained-disappeared and the politically executed bring to each of the sites. The book traces their struggle to memorialise each one, and so unfolds their idealism and hope, courage and frustration, their hatred, excitement, resentment, sadness, fear, division and disillusionment. "This is a beautifully written book, a sensitive treatment of the issues and lives of those who have

faced a great deal of loss, most often as unsung heroes, in what are now recognized as Chilean sites of memory. The book is a testament to people who have not been asked to speak, until Peter Read and Marivic Wyndham ask them to tell their stories. They do not shy away from hard tensions about memorialization, the difficulties of challenging a powerful state and the long and arduous struggles to ensure less powerful voices are heard.' — Professor Katherine Hite, Frederick Ferris Thompson Chair of Political Science, Vassar College, USA.

**The Fourth Turning**-William Strauss 2009-01-16 NATIONAL BESTSELLER

• "A startling vision of what the cycles of history predict for the future."—USA Weekend William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America's past will predict its future. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four eras—or "turnings"—that last about twenty years and that always arrive in the same order. In *The Fourth Turning*, the authors illustrate these cycles using a brilliant analysis of the post-World War II period. First comes a High, a period of confident expansion as a new order takes root after the old has been swept away. Next comes an Awakening, a time of spiritual exploration and rebellion against the now-established order. Then comes an Unraveling, an increasingly troubled era in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. Together, the four turnings comprise history's seasonal rhythm of growth, maturation, entropy, and rebirth. *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for America's next rendezvous with destiny.

**Uncanny Valley**-Anna Wiener 2020-01-14 A NEW YORK TIMES BESTSELLER. ONE OF THE NEW YORK TIMES'S 10 BEST BOOKS OF 2020. Named one of the Best Books of 2020 by The Washington Post, NPR, the Los Angeles Times, ELLE, Esquire, Parade, Teen Vogue, The Times (UK), Fortune, Glamour, Town & Country, Apartment Therapy, Good Housekeeping, Electric Literature, Self, The Week (UK) and BookPage. One of Amazon's Best 100 Books of 2020. A New York Times Book Review Editors' Choice and a January 2020 IndieNext Pick. "A definitive document of a world in transition: I won't be alone in returning to it for clarity and consolation for many years to come." --Jia Tolentino, author of Trick Mirror:

Reflections on Self-Delusion The prescient, page-turning account of a journey in Silicon Valley: a defining memoir of our digital age In her mid-twenties, at the height of tech industry idealism, Anna Wiener—stuck, broke, and looking for meaning in her work, like any good millennial—left a job in book publishing for the promise of the new digital economy. She moved from New York to San Francisco, where she landed at a big-data startup in the heart of the Silicon Valley bubble: a world of surreal extravagance, dubious success, and fresh-faced entrepreneurs hell-bent on domination, glory, and, of course, progress. Anna arrived amidst a massive cultural shift, as the tech industry rapidly transformed into a locus of wealth and power rivaling Wall Street. But amid the company ski vacations and in-office speakeasies, boyish camaraderie and ride-or-die corporate fealty, a new Silicon Valley began to emerge: one in far over its head, one that enriched itself at the expense of the idyllic future it claimed to be building. Part coming-of-age-story, part portrait of an already-bygone era, Anna Wiener's memoir is a rare first-person glimpse into high-flying, reckless startup culture at a time of unchecked ambition, unregulated surveillance, wild fortune, and accelerating political power. With wit, candor, and heart, Anna deftly charts the tech industry's shift from self-appointed world savior to democracy-endangering liability, alongside a personal narrative of aspiration, ambivalence, and disillusionment. Unsparing and incisive, Uncanny Valley is a cautionary tale, and a revelatory interrogation of a world reckoning with consequences its unwitting designers are only beginning to understand.

**New Dark Age**-James Bridle 2019-05-21 "New Dark Age is among the most unsettling and illuminating books I've read about the Internet, which is to say that it is among the most unsettling and illuminating books I've read about contemporary life." - New Yorker As the world around us increases in technological complexity, our understanding of it diminishes. Underlying this trend is a single idea: the belief that our existence is understandable through computation, and more data is enough to help us build a better world. In reality, we are lost in a sea of information, increasingly divided by fundamentalism, simplistic narratives, conspiracy theories, and post-factual politics. Meanwhile, those in power use our lack of understanding to further their own interests. Despite the apparent accessibility of information, we're living in a new Dark Age. From rogue financial systems to shopping

algorithms, from artificial intelligence to state secrecy, we no longer understand how our world is governed or presented to us. The media is filled with unverifiable speculation, much of it generated by anonymous software, while companies dominate their employees through surveillance and the threat of automation. In his brilliant new work, leading artist and writer James Bridle surveys the history of art, technology, and information systems, and reveals the dark clouds that gather over our dreams of the digital sublime.

**The Optics of Ibn Al-Haytham**-Alhazen 1989 Written in the second quarter of the 11th century this work is an important treatise on light and vision. The work is divided into seven books; this translation covers the first three dealing with rectilinear vision.

**Vivaldi's Music for Flute and Recorder**-Michael Talbot 2017-07-05 Federico Maria Sardelli writes from the perspective of a professional baroque flautist and recorder-player, as well as from that of an experienced and committed scholar, in order to shed light on the bewildering array of sizes and tunings of the recorder and transverse flute families as they relate to Antonio Vivaldi's compositions. Sardelli draws copiously on primary documents to analyse and place in context the capable and surprisingly progressive instrumental technique displayed in Vivaldi's music. The book includes a discussion of the much-disputed chronology of Vivaldi's works, drawing on both internal and external evidence. Each known piece by him in which the flute or the recorder appears is evaluated fully from historical, biographical, technical and aesthetic standpoints. This book is designed to appeal not only to Vivaldi scholars and lovers of the composer's music, but also to players of the two instruments, students of organology and those with an interest in late baroque music in general. Vivaldi is a composer who constantly springs surprises as, even today, new pieces are discovered or old ones reinterpreted. Much has happened since Sardelli's book was first published in Italian, and this new English version takes full account of all these new discoveries and developments. The reader will be left with a much fuller picture of the composer and his times, and the knowledge and insights gained from minutely examining his music for these two wind instruments will be found to have a wider relevance for his work as a whole.

Generous music examples and illustrations bring the book's arguments to life.

**Naked City**-Weegee 2015-03-24 When *Naked City* was published in 1945, it was an instant success and inspired a Hollywood film. *Naked City* is Weegees unflinching look at his beloved New York City through photos by turns ironic, hilarious, seamy and brutal. Photographing the city at all hours and in all its guises, Weegee created a thrilling, lonely and candid portrait, and a style that was to inspire younger photographers, not least Diane Arbus. Steidl's facsimile of *Naked City* carefully recreates the original book, bringing to life an object that is in form and spirit as close as possible to the first edition, and of which Weegee would be proud. Weegee (Arthur Fellig, 1899-1968) is best known for his tabloid news photos of urban crowds, crime scenes and New York City nightlife of the 1930s and 1940s. Between 1935 and 1946, Weegee was perhaps the most relentlessly inventive figure in American photography. Weegee later dedicated himself to what he called creative photography, images made through distorting lenses and other optical effects. He also made short films and collaborated with film directors such as Jack Donohue and Stanley Kubrick, as a special-effects consultant and still photographer.

**The Artful Eye**-Richard Langton Gregory 1995 In *The Artful Eye* a luminous cast of scientists, psychologists, and artists investigate the links between art and science, perception and aesthetics, weaving a tapestry of the intelligent brain behind the artful eye. **The Complete Guide to Digital Photography**-Michael Freeman 2008 An illustrated introduction to digital photography, examining hardware such as cameras, computers, scanners, and printers and the relationship between them; looking at image-editing software, tools, and techniques; featuring step-by-step instructions for taking professional-quality photographs; and discussing special-effects options.

**Under the Volcano**-Malcolm Lowry 2000-02-03 One of the twentieth century's great undisputed masterpieces, Malcolm Lowry's *Under the Volcano* includes an introduction by Michael Schmidt in Penguin Modern Classics. It is the fiesta 'Day of the Dead' in the small Mexican town of Quauhnahuac. In the shadow of the volcano, ragged children beg coins to buy skulls made of chocolate, ugly pariah dogs roam the streets and Geoffrey Firmin - ex-consul, ex-husband, an alcoholic and a ruined man - is living out the last day of his life. Drowning himself in mescal while his former wife and half-brother look on, powerless to help him, the consul has become an enduring tragic figure. As the day wears on, it becomes apparent that Geoffrey must die. It is his only escape from a world he cannot understand. His story, the image of one man's agonised journey towards Calvary, became a prophetic book for a whole generation. Malcolm Lowry (1909-1957) was born and died in England. Between school and studying English at St Catherine's College, Cambridge he spent five months at sea as a deckhand, an experience which gave him the material for his first novel, *Ultramarine* (1933). After marrying in Paris, he moved to New York where he completed *In Ballast to the White* (1936). *Under The Volcano* was begun in Hollywood, coloured by a short stay in the Mexico that it describes, and eventually finished in Dollarton, British Columbia. If you enjoyed *Under the Volcano*, you might like F. Scott Fitzgerald's *The Beautiful and the Damned*, also available in Penguin Classics. 'A Faustian masterpiece' Anthony Burgess

**The End of the Affair**-Graham Greene 2018-03-13 Graham Greene's masterful novel of love and betrayal in World War II London is "undeniably a major work of art" (The New Yorker). Maurice Bendrix, a writer in Clapham during the Blitz, develops an acquaintance with Sarah Miles, the bored, beautiful wife of a dull civil servant named Henry. Maurice claims it's to divine a character for his novel-in-progress. That's the first deception. What he really wants is Sarah, and what Sarah needs is a man with passion. So begins a series of reckless trysts doomed by Maurice's increasing romantic demands and Sarah's tortured sense of guilt. Then, after Maurice miraculously survives a bombing, Sarah ends the affair—quickly, absolutely, and without explanation. It's only when Maurice crosses paths with Sarah's

husband that he discovers the fallout of their duplicity—and it's more unexpected than Maurice, Henry, or Sarah herself could have imagined. Adapted for film in both 1956 and 1999, Greene's novel of all that inspires love—and all that poisons it—is "singularly moving and beautiful" (Evelyn Waugh).

**Stolen Time**-Danielle Rollins 2019-02-05 "Endearing, exciting, and very clever, Danielle Rollins' *Stolen Time* is the kind of time-travel story I'm always on the lookout for. I know I can't really speak for him, but I feel like Doc Brown would be onboard with this one."—Kendare Blake, #1 New York Times bestselling author of the *Three Dark Crowns* series "The hauntingly evocative prose seduced me, the compellingly nuanced characters captivated me, and the twisting storyline ensnared my thoughts in an infinite spiral that refused to release me until the final word."—Romina Russell, New York Times bestselling author of the *Zodiac* series *Seattle, 1913* Dorothy spent her life learning the art of the con. But after meeting a stranger and stowing away on his peculiar aircraft, she wakes up in a chilling version of the world she left behind—and for the first time in her life, realizes she's in way over her head. *New Seattle, 2077* If there was ever a girl who was trouble, it was one who snuck on board Ash's time machine wearing a wedding gown—and the last thing he needs is trouble if he wants to prevent his terrifying visions of the future from coming true.

**Philosophy of Technology**-P.T. Durbin 2012-12-06 The corps of philosophers who make up the Society for Philosophy & Technology has now been collaborating, in one fashion or another, for almost fifteen years. In addition, the number of philosophers, world-wide, who have begun to focus their analytical skills on technology and related social problems grows increasingly every year. {It would certainly swell the ranks if all of them joined the Society!} It seems more than appropriate, in this context, to

publish a miscellaneous volume that emphasizes the extraordinary range and diversity of contemporary contributions to the philosophical understanding of the exceedingly complex phenomenon that is modern technology. My thanks, once again, to the anonymous referees who do so much to maintain standards for the series. And thanks also to the secretaries - Mary Imperatore and Dorothy Milsom - in the Philosophy Department at the University of Delaware; their typing and retyping of the MSS, and especially notes and references, also contributes to keeping our standards high. PAUL T. DURBIN vii Paul T. Durbin (ed.), *Philosophy of Technology*, p. vii.

**The Stendhal Syndrome**-Terrence McNally 2004 The Stendahl Syndrome is named for the French novelist, who on a visit to Florence had such a visceral and physical reaction to its beauty that he wrote, "I felt a pulsating in my heart. Life was draining out of me, while I walked fearing a fall." Now Terrence McNally, whom *The New Yorker* has called "one of our most original and audacious dramatists and one of our funniest," has crafted two stunning and witty plays about art and how it transforms us. *Full Frontal Nudity* explores the reaction of three American tourists to the perfection and beauty of Michelangelo's David. In *Prelude & Liebestod*, a renowned conductor watches his life unravel while conducting Wagner's musical masterpiece.

**Flowers for Lisa**-Abelardo Morell 2018-10-16 Best known for his surreal camera obscura pictures and luminous black-and-white photographs of books, photographer Abelardo Morell now turns his transformative lens to one of the most common of artistic subjects, the flower. The concept for *Flowers for Lisa* emerged when Morell gave his wife, Lisa, a photograph of flowers on her birthday. "Flowers are part of a long tradition of still life in art," writes Morell. "Precisely because flowers are such a conventional subject, I felt a strong desire to describe them in new, inventive ways." With nods to the work of Jan Brueghel, Édouard Manet, Georgia O'Keeffe, René Magritte, and others, Morell does just that; the images are as innovative as they are arresting.

**Photographic Printing**-Gene Nocon 1993-01 A guide to photographic printing. Using only the equipment and materials already available in the average darkroom, the Nocon method puts top-quality prints within the reach of the inexperienced as well as the professional photographer.

**Dark Alliance**-Gary Webb 2011-01-04 Major Motion Picture based on *Dark Alliance* and starring Jeremy Renner, "Kill the Messenger," to be released in Fall 2014 In August 1996, Pulitzer Prize-winning journalist Gary

Webb stunned the world with a series of articles in the San Jose Mercury News reporting the results of his year-long investigation into the roots of the crack cocaine epidemic in America, specifically in Los Angeles. The series, titled "Dark Alliance," revealed that for the better part of a decade, a Bay Area drug ring sold tons of cocaine to Los Angeles street gangs and funneled millions in drug profits to the CIA-backed Nicaraguan Contras. Gary Webb pushed his investigation even further in his book, *Dark Alliance: The CIA, The Contras, and the Crack Cocaine Explosion*. Drawing from then newly declassified documents, undercover DEA audio and videotapes that had never been publicly released, federal court testimony, and interviews, Webb demonstrates how our government knowingly allowed massive amounts of drugs and money to change hands at the expense of our communities. Webb's own stranger-than-fiction experience is also woven into the book. His excoriation by the media—not because of any wrongdoing on his part, but by an insidious process of innuendo and suggestion that in effect blamed Webb for the implications of the story—had been all but predicted. Webb was warned off doing a CIA expose by a former Associated Press journalist who lost his job when, years before, he had stumbled onto the germ of the "Dark Alliance" story. And though Internal investigations by both the CIA and the Justice Department eventually vindicated Webb, he had by then been pushed out of the Mercury News and gone to work for the California State Legislature Task Force on Government Oversight. He died in 2004.

**The Dark Room**-Jonathan Moore 2017-01-10 "If you like Michael Connelly's novels, you will gobble up Jonathan Moore's *The Dark Room*." —James Patterson "Channels the moody intensity of Raymond Chandler's crime fiction." —Washington Post Gavin Cain, an SFPD homicide inspector, is at an exhumation when his phone rings. The mayor is being blackmailed and has ordered Cain back to the city; a helicopter is on its way. The casket,

and Cain's cold-case investigation, must wait. At City Hall, the mayor shows Cain four photographs he's received: the first, an unforgettable blonde; the second, pills and handcuffs on a nightstand; the third, the woman drinking from a flask; and last, the woman naked, unconscious, and shackled to a bed. The accompanying letter is straightforward: worse revelations will come unless the mayor takes his own life first. An "electrifying noir thriller,"\* *The Dark Room* tracks Cain as he hunts for the blackmailer, pitching him into the web of destruction and devotion the mayor casts in his shadow. **Subsea Optics and Imaging**-John Watson 2013-10-31 The use of optical methodology, instrumentation and photonics devices for imaging, vision and optical sensing is of increasing importance in understanding our marine environment. Subsea optics can make an important contribution to the protection and sustainable management of ocean resources and contribute to monitoring the response of marine systems to climate change. This important book provides an authoritative review of key principles, technologies and their applications. The book is divided into three parts. The first part provides a general introduction to the key concepts in subsea optics and imaging, imaging technologies and the development of ocean optics and colour analysis. Part two reviews the use of subsea optics in environmental analysis. An introduction to the concepts of underwater light fields is followed by an overview of coloured dissolved organic matter (CDOM) and an assessment of nutrients in the water column. This section concludes with discussions of the properties of subsea bioluminescence, harmful algal blooms and their impact and finally an outline of optical techniques for studying suspended sediments, turbulence and mixing in the marine environment. Part three reviews subsea optical systems technologies. A general overview of imaging and visualisation using conventional photography and video leads onto advanced techniques like digital holography, laser line-scanning and range-gated imaging as well as their use in controlled observation platforms or global observation networks. This section also outlines techniques like Raman spectroscopy, hyperspectral sensing and imaging, laser Doppler anemometry (LDA) and particle image velocimetry (PIV), optical fibre sensing and LIDAR systems.
